Reformer INTRO

Learn the fundamentals of Fletcher Pilates, explore spring resistance, and be introduced to a variety of challenging and fun Reformer exercises designed to strengthen, stretch, and support the entire body. (required prior to attending Reformer classes)

Reformer

Group Reformer classes provide a dynamic, full-body workout that builds strength in both the upper and lower body, develops control through new ranges of motion, and enhances spinal mobility. Spring resistance both supports and challenges the body. (prerequisite Reformer INTRO or 5 Private classes)

Wunda Chair INTRO

Transfer your Pilates experience to this compact piece of equipment with spring resistance. Group Wunda Chair INTRO provides a similar dynamic, full-body workout as does the Reformer while further challenging balance and proprioception and expanding one's knowledge of the Fletcher Pilates repertoire. (previous Pilates experience required)

Wunda Chair

These group classes build on your existing Wunda Chair experience. This full-body workout continues to challenge balance, proprioception and endurance with spring resistance on a compact footprint. (prerequisite Wunda Chair INTRO)

Matwork & Small Apparatus

A full-body workout designed to strengthen the deep core muscles that support the spine and promote balanced and efficient movement throughout the entire body. To challenge strength and endurance, and increase mobility and body awareness, a selection of Matwork, Spine Corrector and Magic Circle might be taught alongside Fletcher Pilates® signature techniques: Towelwork, Floorwork, and Barrework. Roller work and stretching are also incorporated to release tension, and create a well-rounded class.

Strength, Conditioning, Mobility

This challenging and well-rounded class will include dynamic movement, balance and coordination tasks, as well as stability and alignment work. Drawing from Matwork & Small Apparatus and various other movement modalities with options to regulate the level of difficulty.

Bone Health

Utilizing weights and resistance bands and also drawing from Small Apparatus elements. This class includes balance and coordination tasks, as well as mobility and stability work, abdominal work and pelvic floor engagement. Ideal for those with osteoporosis or loss of bone density but challenging for anyone.

Barrework

Fletcher Barrework class has everything from simple leg and foot articulation to more complex, yet accessible, locomotion sequences. Utilizing Fletcher Fundamentals for organization in standing and drawing from Small Apparatus elements for a fully integrated, full body movement experience. Challenging for those with more movement experience and very user friendly for those with less.
